Reasons for allowance

The following is an examiner's statement of reasons for allowance:

1. None of the prior art disclosed or suggested to show the particular structure and/or the particular operation recited in these claims namely: **"an insulated double gate FET ... a second signal that has a same signal-level temporal change direction and a same signal amplitude as the first signal** and has a signal level shifted by a predetermined magnitude to a second gate electrode" as recited in claim 1; **"an insulated double gate FET ... a second signal that has a same signal-level temporal-change direction and a same signal amplitude as the first signal** and has a slower or faster rise time or fall time to a second gate electrode" as recited in claim 2; **"an insulated gating signal in a double gate FET ... a second signal that has a same signal-level temporal-change direction and a same signal amplitude as the first signal** and has a predetermined time difference to a second gate electrode" as recited in claim 3.

2. Applicant's amendment filed on 7/5/05 has been received and entered in the case. The amendment and argument presented therein overcomes the rejections noted in the previous Office action, and therefore, are withdrawn.

3. The prior art reference submitted by the applicant on IDS form received on 5/11/04 was reviewed and considered. However, the limitation **"an insulated double gate FET ... same signal amplitude as the first signal"** is not disclosed. Therefore, the claims are patentably distinct over this prior art reference of record.

4. The newly prior art references cited on PTOL-892 are for interest and documentation purposes only. The Schiirmann (U.S Patent No. 4,275,361) or the Horvat (Ref. No. 2571188) appear to be the best references with respect to the claimed invention. However, the limitation **“an insulated double gate FET .. a same signal amplitude as the first signal”** recited in claims 1-3 are not disclosed. Therefore, the claims are patentably distinct over all these prior art references of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
